[What Is It?](#) • [Security Research Causes Security Scare](#) • [If it Works, Use it](#) • [You Will Need a Bigger Leash](#) • [Double Standard = Poor Standard](#) • [IT Security](#) • [He Had a "Head" for Security](#) • [Access Control Needs Good Control](#) • [It's in the Numbers](#) • [Oops!!](#) • [X-ray Eyes](#) • [X-ray Quiz](#) • [Solution](#)

What is it?

The above image was sent in by a client as an obvious weapon. The client wished to know if it was loaded. At first glance it appears to be a regular firearm but when you analyze the image you can see the dark blue slide which would indicate a dense metallic material. The handle though is light green, which is indicative of a light material such as aluminum or plastic composition.

This would not be consistent with a real firearm. Furthermore the magazine which when empty, would show a spring and when loaded would depict ammo. This though appeared to contain a dense rectangular object.

What is it?
Answer on page 4!

Security Research Causes Security Scare

Two faux pipe bombs which were part of a national security research project on campus caused a bomb scare at an [Arizona University](#). Another example of problems which are created when the possession of training aids are mismanaged.
